Activity Statement

Writing a Project Abstract

Context

You have just started your final-year project. In order to clearly define and structure your project, you are asked to write a short abstract, similar to those found in scientific papers or PhD theses.

Objective

The goal of this activity is to summarize your project in a clear, concise and professional way. The abstract must allow a reader to understand your project without reading the full report.

Instructions

Write an abstract in English that presents:

- the context or problem addressed by the project
- the main objective of the project
- the proposed technical solution
- the main constraints
- the expected result or final product

Constraints

- Length: **200 to 250 words (1 page)**
- Language: **English**
- Style: clear, neutral and professional
- Use simple sentences and present tense
- Do not use "we" → prefer impersonal forms (e.g. *This project aims to...*)
